

DATOlution GmbH pioneers mobile solutions applying to fire detection technologies. After successful launch of our app and cloud solutions our goal now is to enhance and accelerate the development cycles of our products. Therefore we are looking for you to join our team as

## **IT Developer for Apps and Cloud Solutions in Fire Detection Technologies**

at our headquarters in Erlangen.

### **Your tasks are**

- development of mobile application and cloud solutions (iOS and Android primarily) for our products
- to read and to analyze proprietary protocols
- customer support
- as a future perspective: team lead

### **Your profile includes**

- Bachelor's or Master's Degree in computer science, information technology or comparable qualification
- enthusiasm about developing mobile apps
- knowledge of Java, Android and Apple app development
- ability to work self-directed and under time pressure
- excellent conduct towards our customers
- programming experience – to be proven if necessary
- willingness to learn new technologies

### **Our offer**

Being a small team we are dependent on our employees' ongoing professional development which we happily support based on your individual performance. As an example we will take over the costs for language lessons since the job definitely requires German language skills.

Based on your dedication you may become responsible for your own product range. To facilitate your start with us we are happy to assist you with the Blue Card and – if interested – may offer you an apartment.

### **Your application**

If this sounds interesting to you we are more than happy to receive your application, including your CV, your earliest possible entry date as well as your desired salary.

*Please send your application to:*
